

Vibrant Moves to New, Larger Headquarters

Albuquerque, NM – January 15th, 2018 – Vibrant is growing! Vibrant has grown by a factor of two since the 2014 and relocation into a new facility was a must. Situated in a bustling commercial zone in Albuquerque's North Valley just a half mile north of its old facility, Vibrant's new headquarters offers significant room to grow. The 8,100 sq. ft. building accommodates Vibrant's staff and equipment for its engineering, testing services, and production operations and Vibrant's growth isn't done yet. In August 2018, Vibrant will occupy the second suite of its new building, adding another 4,200 square feet of office space.

Most of the move was accomplished over the course of two days, with less than 24 hours of downtime for most operations. "Big moves are always a challenge," said Vibrant Vice President Greg Weaver, "but when you're growing like we are it's a nice problem to have. Everybody pitched in and did whatever needed to be done and we hit the ground running."

The new Vibrant HQ offers easy access to major roadways, bicycle routes, restaurants, lodging, and special amenities like Albuquerque's Balloon Fiesta Park. "The staff has given the new location high marks so far," said Weaver. "The new location has kept everyone's commute virtually the same. The fresher surroundings and larger space make it a better working environment."

About Vibrant

Vibrant provides Process Compensated Resonance Testing services to the Aerospace and Power Generation industries worldwide through its facilities in the United States and Europe. PCRT applications range from quality assurance and process capability assessment for Original Equipment Manufacturers to in-service structural assessment and life monitoring for Maintenance, Repair, and Overhaul organizations. Vibrant is certified to AS9100 Rev C, and ISO 9001:2008. www.vibrantndt.com
